'Link' Operation Guide
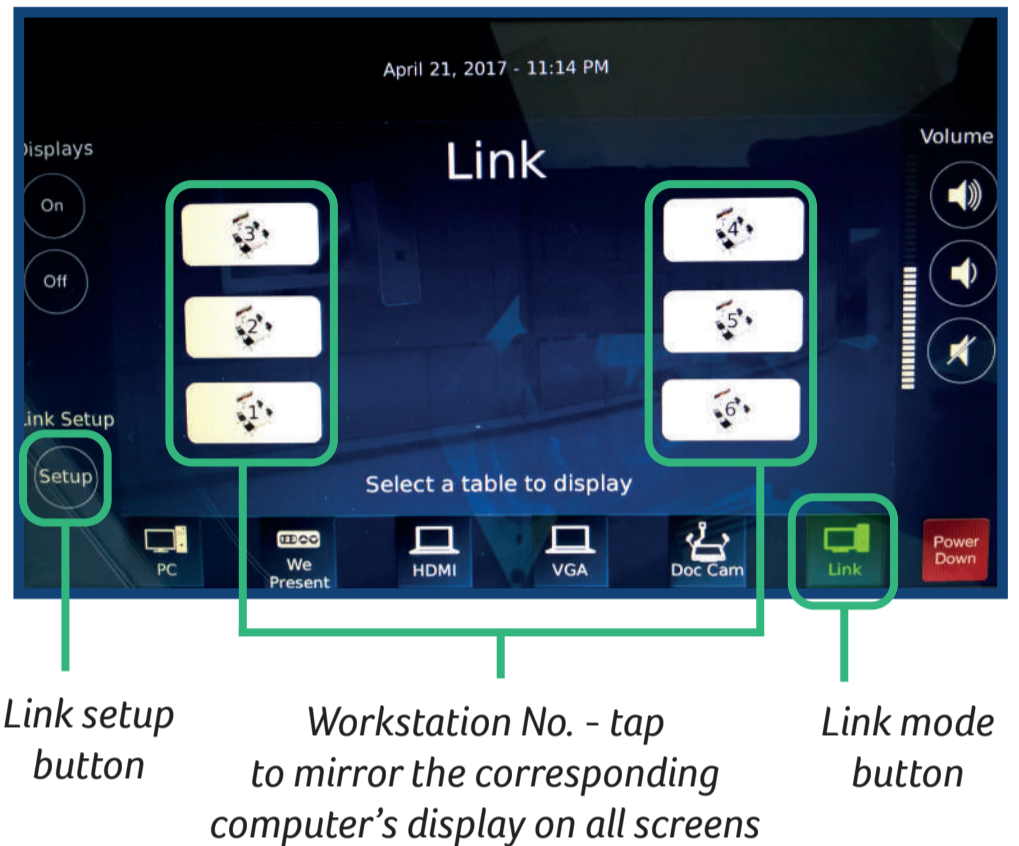

...a short walkthrough to advanced usage of the Collborative Learning suite IT & AV equipment.

Link mode – Display Selection

April 21, 2017 - 11:14 PM

Link

1 Set the input source to 'Link' on the touch controller display.

2 Tap the corresponding button to display the workstation you want mirrored accross all screens.

3 Enter the 'Link setup' page to enable/disable individual workstation display control.

Link setup button

Workstation No. – tap to mirror the corresponding computer's display on all screens

Link mode button

Tap the relevant workstation button to link/unlink it from being controlled by the master AV cabinet controller.

Press link/unlink all to universally release or regain mirroring from the AV cabinet master controller across all workstation displays.

Once a workstation is unlinked, or is the link selection, the input source can be selected on the Extron control panel located under that workstation's display.
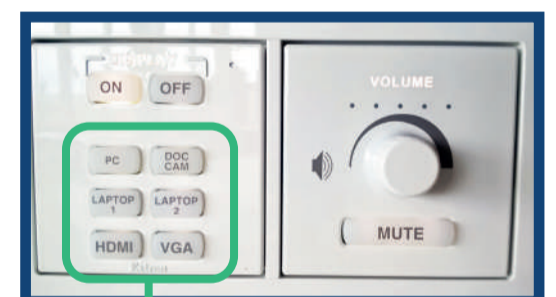

Link Setup Window

Link Control

Workstation Control Panel

Link/Un-Link Displays (Universally)

Link/Un-Link individual display for individual control/no participation in Link display mirroring

Input selection controls for workstations.

If you have followed these steps and there is still an issue that requires immediate attention, please call the helpline on **ext. 8469**.
IT-AV Technicians: room OA3/09, ext. 2388 (Alex) and 1162 (Farah/Ben).
